

Thank you for your participation in the CHOP Biobank! This bi-annual newsletter is meant to keep you updated on CHOP Biobank activities and how the Biobank is enabling breakthroughs at CHOP.

The CHOP Biobank was featured in a CHOP Where Discovery Leads article in June of this year.

With its new institutional-wide biobank, CHOP is in the unique position to have biobanking represent its diverse patient community including those not typically contacted for research and apparently healthy neuro-typical children without chronic disease. "What the CHOP Biobank allows us to begin to pivot toward is ... the ultimate goal in pediatrics of providing predictive medicine," said Lisa Guay-Woodford, MD.

[CHOP Biobank: Unlocking the Secrets to Childhood Health and Disease](#)

All CHOP patients are eligible to participate! Please share the Biobank webpage, [CHOP Biobank: Making Breakthroughs Together | Children's Hospital of Philadelphia](#) with other CHOP families who may be interested.

You may withdraw from the CHOP Biobank at any time. Please contact the Study Team at [biobank@chop.edu](mailto:biobank@chop.edu) or 267-426-7755.
