

VACCINE TRIVIA IN PRACTICE

The Just the Vax trivia game is a popular destination on the Vaccine Education Center (VEC) website. So, the VEC created a toolkit for healthcare providers to use the content from the trivia game to assist in clinical and professional settings.

The toolkit is designed to:

- Engage staff
- Enhance print and digital materials
- Present vaccine information to patients, families and the public in fun ways
- Keep everyone having fun with vaccine trivia

Access the trivia toolkit:
vaccine.chop.edu/vaccineupdate
Select "Provider Toolkit"

About the Vaccine Education Center

The Vaccine Education Center was launched in October 2000 to provide accurate, comprehensive and up-to-date information about vaccines and the diseases they prevent. The Center, through its websites, videos, informational tear sheets, e-newsletters, webinars and speaker programs, seeks to dispel some of the common misconceptions and misinformation surrounding vaccines. The Vaccine Education Center is funded by Children's Hospital of Philadelphia. The Center does not receive support from vaccine manufacturers.

Vaccine Trivia
JUST THE VAX
TOOLKIT
for Healthcare Providers

Formats for use

- **Flashcards**

Notecard-sized flashcards can be printed four per page to view multiple choice questions on the front and answers with supplementary info on the back.

- **Question sets**

Single-sheet PDF files each include 10 multiple-choice questions on the front with answers and additional information on the back. Versions without answers are also available.

- **Online game**

Play randomized, 10-question rounds in one of four categories at vaccine.chop.edu/trivia.

- **Content**

Browse more than 200 vaccine- and science-related trivia questions for other uses.

Ways to use the trivia toolkit content

- Use to play a competitive game during
 - Conferences
 - Staff meetings
 - Presentations
- Place questions on seats or at place settings during meetings to facilitate conversation between attendees.
- Use content for or post links on
 - Social media
 - Newsletters
 - Websites
- Use to engage new or expectant parents during parenting classes.
- Put copies in waiting or exam rooms, so patients and families can play/learn while waiting.
- Use at the start of a staff meeting for a door prize or game.
- Check or sharpen your staff's knowledge on a particular aspect of vaccines.
- Make a bulletin board displaying questions and answers.

Have an idea? Share it with us!

We're always interested in new and different ways people find to use the game and resources.

If you have new ideas or experiences, please email us: vacinfo@email.chop.edu

Sample Question 2

What famous kid's game was invented by Eleanor Abbott while she recovered from polio in a hospital ward?

- A. Chutes and Ladders
- B. Jacks
- C. Candy Land
- D. Trouble

The correct answers are:

1. B. Washington witnessed many epidemics, including the yellow fever epidemic in 1793. In his teenage years, Washington was often sick and fell ill with diphtheria, malaria and smallpox at ages 15, 17 and 19, respectively.
2. C. Eleanor Abbott designed Candy Land in 1945 while she recovered from polio in a San Diego hospital ward. Candy Land was inducted into the National Toy Hall of Fame in 2005.

Sample Question 1

What U.S. president survived infections with smallpox, diphtheria and malaria?

- A. Andrew Jackson B. George Washington C. Ulysses S. Grant D. John Adams
